AAC Assessment Compass

Functional Communication

Add to your traditional speech-language assessment to identify:

- Child and partner skills
- Communication needs
- Access needs
- Contexts for communication learning

Feature Matching

Compare AAC system features to the child's needs to determine:

- Language system
- Access method(s)
- Tech Features needed

System Design

Customize the system for trial, including:

- Vocabulary Selection
- Interface features
- Access Needs

System Trials

Trial more than one system that fits the child's needs by:

- Focusing on Aided Language Modeling
- Taking data
- Supporting family-centered decision-making
